

Stella della mamma (Mother's star)

Design: Francesco Mancini

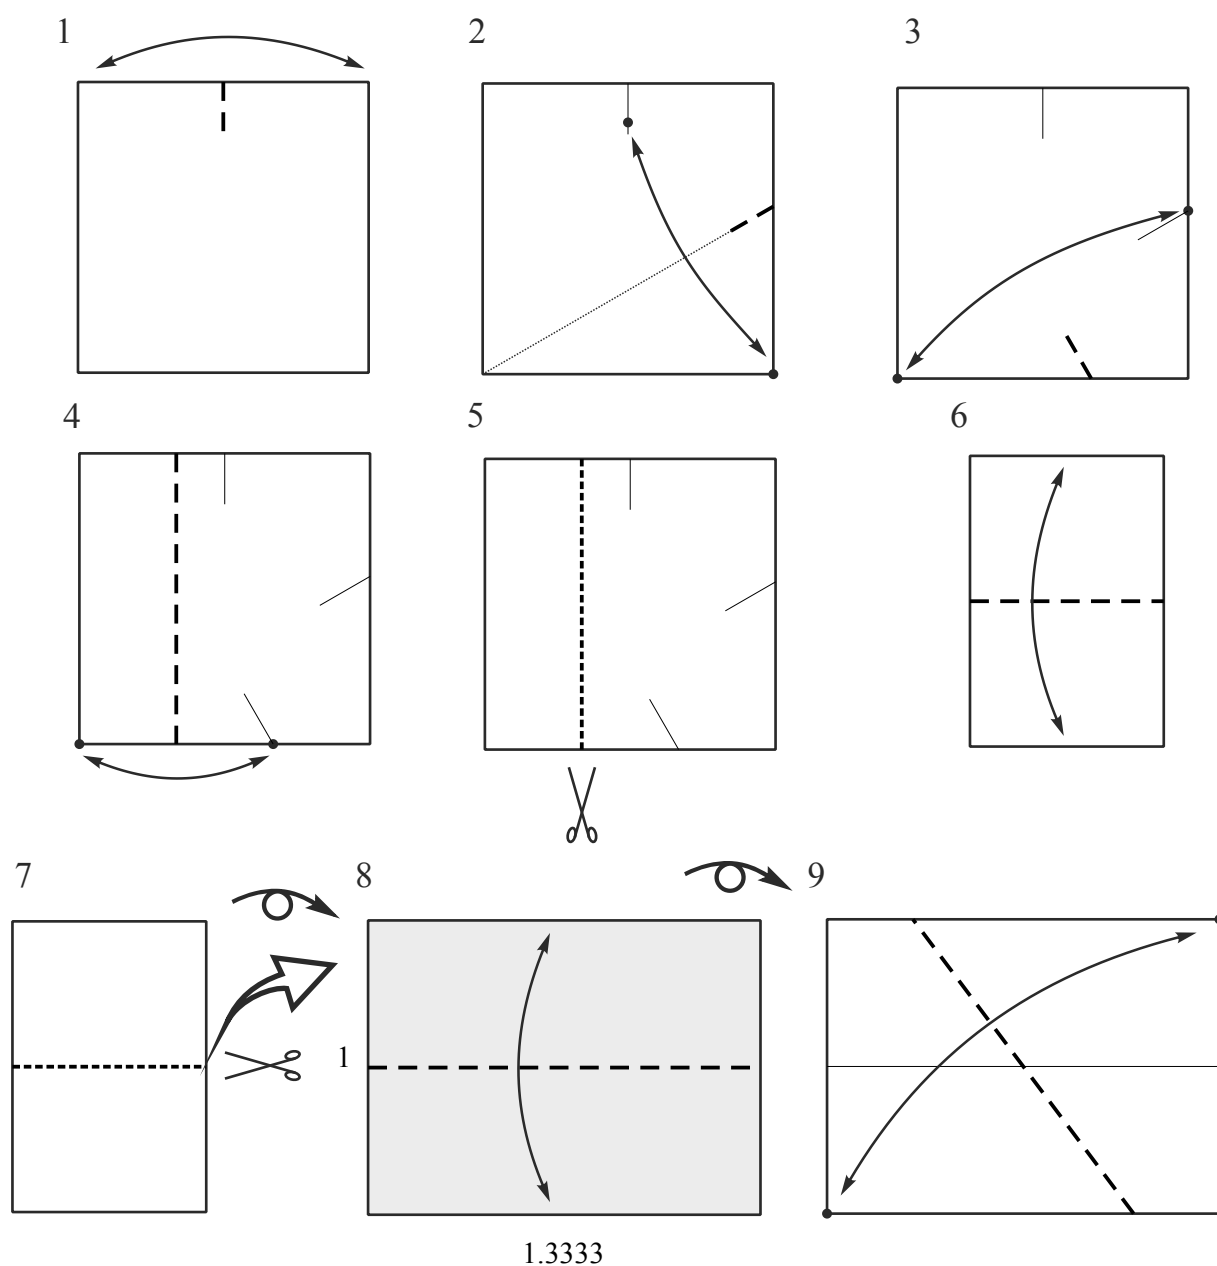

Diagrams: Francesco Decio/ Francesco Mancini

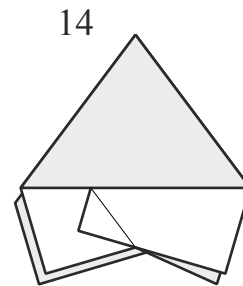

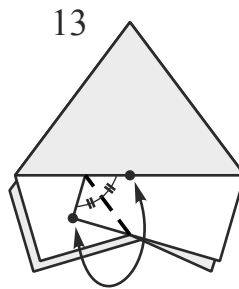

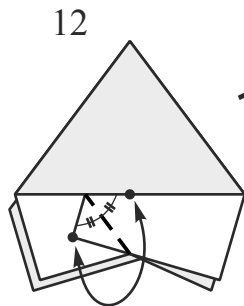

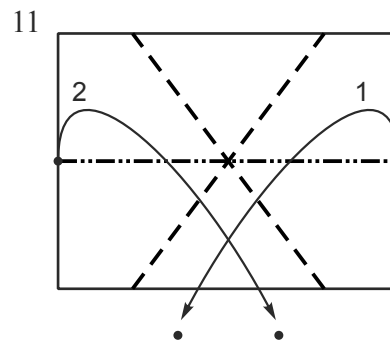

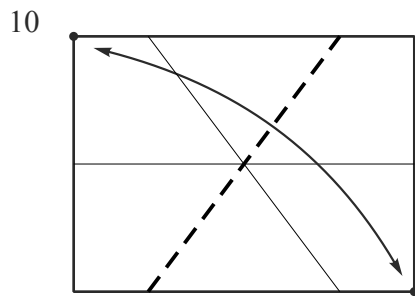

My uncle suggested me to name this model Mother's heart. But it is a star so I changed in Mother's star.

It's a perfect match: I designed it in my mother's house and it has 11 units (this year the mother's day was May 11th).

You will need 11 rectangles of ratio 1:1.333. You can obtain them by cutting 6 squares.

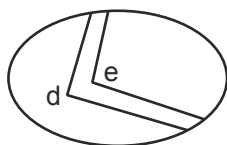

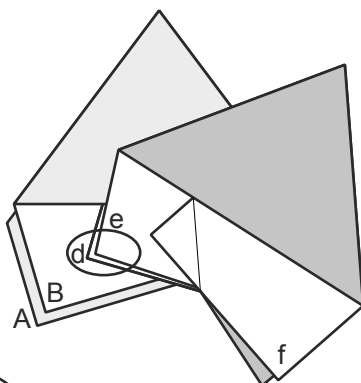

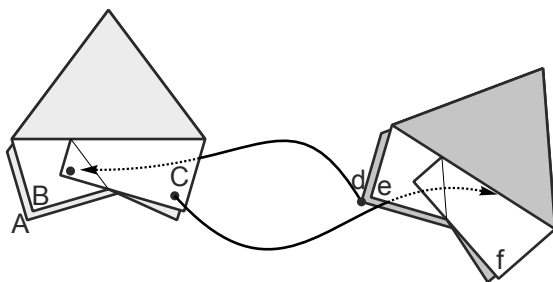

Works fine with kami duo-kami, colored kraft.

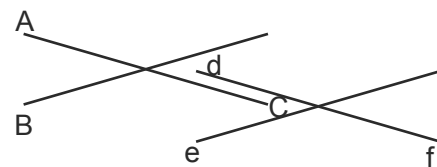

Unit finished
X 11

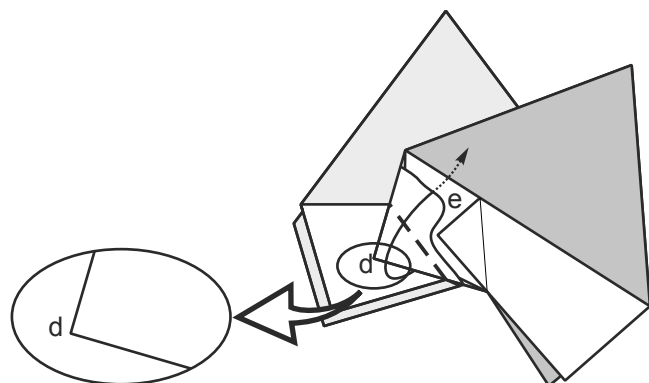

Assembly of the units

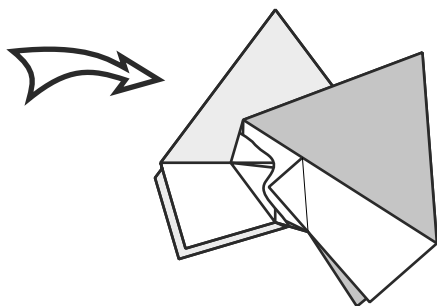

Fold the lower corner only (d)
following the crease created in step 12
